
Contributions of this paper

C1 — **CognitiveGaze dataset (§3)** *steps 2, 3*

18 participants, 7 clinical oculomotor tasks,
smartphone and EyeLink 1000 recorded together

C2 — **Gaze utility benchmark (§4, §8)** *steps 2, 5*

4 architectures, 4 train–test conditions, noise floor,
no-information reference, pupil test, clinical error budget

C3 — **Privacy measurement protocol (§6, §7)** *steps 4, 5*

re-identification (A1) and linkability (A2) against
measured floors, released as the privaudit tool

C4 — **Privacy–utility analysis (§7–§10)** *steps 5, 6*

3 generator families on one plane, two-part condition,
seven design guidelines, controlled release
